

## Hibernian Hotel

In 2013, the management of The Hibernian Hotel chose REL to upgrade their drinks dispense and food cooling systems in the hotel. One of the primary reasons they chose REL to upgrade their systems was to reduce the amount of equipment required to cool both beverages & food while consistently serving a quality beverage at its correct temperature.

After site survey, REL replaced the compressors for the ice bank, bottle coolers, beer cold room and food cold rooms with a centralised Glycol system
