

IAA – Shannon Airport

Shannon Airport is one of Ireland's main three airports and in 2016, over 1.75 million passengers passed through the airport. In 2017, REL completed a challenging compressor unit replacement at the airport which included replacement of old compressor units, recommissioning of chiller unit and disposal of old compressor units and refrigerant gas.

Scope of works:

- Replacement of 3 Hitachi Scroll Compressor Units.
- Commissioning of Chiller Unit.
- Disposal of Compressor Units & Refrigerant Gas.
